SUMMARY

Aspiring Software and Machine Learning Engineer with experience in MERN stack development, machine learning, and image processing. Skilled in building scalable web applications and AI-driven systems, with strong problem-solving and collaboration abilities.

SKILLS

Languages: C++, Python, Java

Technologies: MERN Stack, TypeScript, FastAPI, PostgreSQL, Redis, Docker, OpenCV, Open3D, PyTorch

Roles: Full Stack Developer, AI/ML Engineer

Soft Skills: Leadership, Communication, Time Management, Teamwork

EXPERIENCE

Full Stack Development Intern — Edubot Technologies Pvt. Ltd. — [Certificate](#) Jun 2025 – Aug 2025
Hands-on experience with MongoDB, Express.js, React, and Node.js through structured training and a capstone project, building secure and modular web applications.

Machine Learning Intern — SRM University AP Nov 2025 – Dec 2025
Developed ML models for depth vs force prediction using UR5e robot and ZED2i camera; implemented 3D plane segmentation and transformation matrices.

Image Processing Intern — SRM University AP Feb 2025 – May 2025
Worked on 3D point cloud processing and real-time pothole detection using Open3D and OpenCV, estimating depth and volume from visual data.

PROJECTS

StockVision AI — <https://github.com/Vishal-gvs/StockVision-AI>

ML-powered stock monitoring and forecasting platform integrating a React–TypeScript frontend, Node.js backend, and FastAPI microservice using LSTM models, Docker, PostgreSQL, and Redis.

Multi-User To-Do List App — <https://todo-list-app-omega-mocha.vercel.app/>

MERN-based task management system with authentication, role-based access control, and persistent storage.

ClientSync — <https://client-sync-swart.vercel.app/>

React–Vite–Tailwind frontend for managing clients and projects with real-time UI state synchronization via a modular API layer.

Hotel Guest Sentiment Analyzer — https://github.com/Vishal-gvs/Review_Sentiment_analyser

A full-stack machine-learning web application that analyzes hotel reviews, predicts sentiment, and stores user analysis history. Built with Flask, NLTK, Scikit-Learn, TextBlob, PostgreSQL, and deployed on Render.

Text to Speech Converter and Summarizer — <https://github.com/Vishal-gvs/Text-to-speech-summarizer>

Developed an Text to speech converter and summarizer using python which uses Python libraries like NLTK for text preprocessing, Sumy or Transformers for summarization, and pyttsx3 or gTTS for text-to-speech conversion.

CERTIFICATIONS

AI/ML Course Completion Certificate — TeachNook — [Certificate](#) Dec 2023

Web Development Basics completion Certificate — IBM — [Certificate](#) Dec 2023

Developing Sites - completion Certificate — IBM — [Certificate](#) Dec 2023

EDUCATION

B.Tech in Computer Science Engineering, SRM University AP 2023 – 2027

GPA: 9.12 / 10.0

Class XII — BIEAP (955/1000) 2022

Class X — APSSC (600/600) 2021

Achievements

- Working on a research project likely to be published in March-2026.
- Actively participated in Hackathons conducted in the university.
- Volunteered in CR/CS department of placement Coordination – Active participation in events.
